Cybersecurity Support Technician

High-demand IT occupational roles such as Cybersecurity Support Analyst professionals work to maintain the security and integrity of information technology systems, networks and devices. According to the National Cybersecurity Workforce Framework, cybersecurity professionals perform one or more of the following functions: securely provision, operate and maintain, protect and defend, investigate, collect and operate, analyze and provide oversight and development.

The Learning Center's Cybersecurity Support Technician (CST) Program is designed to develop the skills and competencies for individuals who want to enter this career field.

What's Included:

- Global industry certifications: Cisco CCNA, EC-Council CND Certified Network Defender, EC-Council CEH Certified Ethical Hacker
- Intensive hands-on skills development with an experienced Subject Matter Expert (SME)
- Students are provided labs/exercises hosted on our Cyber Range to develop skills and abilities
- This program is Intermediate level and is designed to prepare individuals for the next level cybersecurity disciplines.
- Occupational training in alignment with the NICE Framework – National Initiative for Cybersecurity Education – a NIST/DHS program

Cybersecurity Support Technician includes:

Cisco CCNA: As more enterprises migrate towards automation and controller-based architectures, the knowledge and skills required of a networking professional are evolving and more vital than ever. To prepare for this network transition, the CCNA 200-301 certification will not only prepare you with the knowledge of fundamental networking standards and technologies, but ensure you stay relevant with skill sets necessary for the adoption of next generation Cisco technologies.

EC-Council CND: EC-Council's Certified Network Defender has been designed by industry experts to help IT Professionals play an active role in the Protection of digital business assets and to the Detection and Response to Cyber Threats, while leveraging Threat Intelligence to Predict them before they happen.

EC-Council CEH: A Certified Ethical Hacker is a skilled professional who understands and knows how to look for weaknesses and vulnerabilities in target systems and uses the same knowledge and tools as a malicious hacker, but in a lawful and legitimate manner to assess the security posture of a target system(s).

EC-Council's Certified Network Defender and Certified Ethical Hacker is compliant with ISO 17024 standards and approved by the US DoD to meet directive 8140/8570.01-M requirements.
