

# Certified Information Security Manager®

An ISACA® Certification

## ISACA's Certified Information Security Manager (CISM)

ISACA's Certified Information Security Manager (CISM) certification indicates expertise in information security governance, program development and management, incident management and risk management.

### Skills measured

- Information Security Governance
- Information Security Risk Management
- Information Security Program
- Incident Management

ISACA's CISM is compliant with ISO 17024 standards and approved by the US DoD to meet directive 8140/8570.01-M requirements.

**Our unique model follows a streamlined approach to workforce development and skills attainment**

**Assess:** Assess each student to determine existing skill sets

**Educate:** Deliver goal-specific training utilizing all delivery modalities

**Mentor:** Expose students to instructors and mentors with front-line IT and cybersecurity experience

**Certify:** Certify students with the requisite hands-on skills to perform the tasks related to their functional roles

**Validate:** Validate student abilities through performance analytics and real-world exercises hosted on a cyber range
